

Step 4: Implement the Solution (Word Code)

```
START
SET feeding_times = [08:00, 18:00]
LOOP every minute:
    current_time = GET current clock
    IF current_time IN feeding_times THEN
        IF food_level > 0 THEN
            ACTIVATE servo_motor (rotate 90°)
            DISPENSE food
            WAIT 10 minutes
            IF bowl_weight unchanged THEN
                SEND alert "Pet not eating"
            ELSE
                LOG "Feeding successful"
            ENDIF
        ELSE
            SEND alert "Food container empty"
        ENDIF
    ENDIF
END LOOP
STOP
```
