

Step 5: Test and Refine (Scenarios)

Test Case	Input Values	Expected Output	Actual Result	Refinement
Pet eats normally	Time=08:00, Food level=Full, Bowl weight decreases	Food dispensed, no alert	✓	None
Pet does not eat	Time=08:00, Food level=Full, Bowl weight unchanged	Alert: “Pet not eating”	✓	Add retry before alert
Food bin empty	Time=18:00, Food level=Empty	Alert: “Food container empty”	✓	Add “Refill bin” reminder

Refinement Ideas:

- Add a **retry feeding attempt** before sending alerts.
- Add **data logging** for staff records.
- Include **battery check** for reliability.
